Jakarta Composite Index

JCI closed higher by 1.74% to the level of 6,340.02 in Tuesday's trading (21/07), moving in the range of 6,247.35 – 6,340.02. Technically, JCI continued its gains after breaking out above the EMA50, indicating that the medium-term uptrend is increasingly confirmed. The RSI (14) increased to the level of 63, reflecting still solid bullish momentum. As long as it holds above the EMA50, JCI has the opportunity to test resistance at 6,377. If successfully broken, the strengthening has the potential to continue toward 6,398 – 6,459. Conversely, if it fails to break 6,377, JCI has the potential to experience profit taking with support areas at 6,286 – 6,257 (EMA50), followed by 6,231 as the gap area. **KIWOOM RESEARCH** suggests investors can average up if JCI manages to breakout above 6,377, while investors who are already in profit are advised to apply a trailing stop in the EMA50 area (6,257) to secure gains.

ADVISE: Set your trailing stop or average up.
